Physiotherapist
UAB „Eglės" sanatorija
2018-07 - 2021-07

LANGUAGES

- Lithuanian (Native)
- English (B2)
- Russian (C)

ABOUT ME

After graduating, I successfully worked as a physiotherapist for several years. For a number of years, I was one of the most valued specialists of my clients, but I was missing something. Therefore, I remembered my teenage interest in programming and started learning on my own. While I was studying, the desire to learn something new - grew, so I successfully completed Vilnius Coding School Java course. I am actively expanding my knowledge in the field of programming. My goals include continuous improvement and skill development, especially in working with Java. My skills includes problem-solving, teamwork, and a passionate desire to progress. Currently, I am seeking opportunities that will allow me to continue learning and growing in my professional career.

EDUCATION

JAVA course
Vilniaus Coding School
2023-07-14 - 2023-09-13, 2 months 160 hours

During the course I learned strong Java basics, learned to create/work with projects using Spring Boot, work with data using MySQL, create android applications using Java, use GitHub and Docker platforms.
